Important Correction to TEI-files based on the TEI_P5_Template.xml

The TEI-files you create for DMT Assignment 1, based on the TEI_P5_Template.xml, are validated against the TEI Schema online (as specified in the document's XML declaration, line 1):

```
<TEI xmlns="http://www.tei-c.org/ns/1.0" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://www.tei-c.org/ns/1.0 http://www.tei-c.org/release/xml/tei/custom/schema/xsd/tei_all.xsd" xml:id="xxxxxxxxxx">
```

This schema was recently changed. To ensure that your files continue to be valid, please do the following: an extra element `<publisher>` must be added as a preceding sibling of the `<idno>` element in the `<publicationStmt>` that you find under `<sourceDesc>`. This element can be copied from the other `<publicationStmt>`, that is a direct child of `<fileDesc>`. Note that the two `<idno>` elements might share a name, but do not have the same content!

In the figure below, the `teiHeader`'s structure is represented schematically, to allow you to find the relevant elements in your file.

Please contact bdms.staff@gmail.com in case you have any questions.
